9/29/93

Mr. Roger McCarthy  
Failure Analysis  
149 Commonwealth Drive  
Menlo Park, CA 94205

Dear Mr. McCarthy,

Until today, I was inclined to believe that I'd not heard from you in response to my letter of the 12th because you might be busy. But today I heard from a friend who has been a serious researcher into the JFK assassination that his request for information is also being ignored.

tt

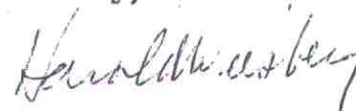

My project is a book and it will be published. I have most of it written. Your failure to respond and to provide any information at all creates a problem of which you may not have thought. I will have to state <sup>this</sup> that and cite only some newspaper accounts. This will put you in the position of having made one side available in this very controversial matter through Dr. Robert Fiziali and denied me and others anything at all, particularly that other side about which I am told you did comment publicly. This makes you a partisan, as it does Failure Analysis. However I phrase it, this will be apparent and I do believe it should be, given all the circumstances

I have already typed most of the manuscript ~~it~~ and I will not delay the rest.

When my book is published I think you may have a better idea <sup>of your own opinion and</sup> of what you individually have become part of than I believe you now can really know.

I ask again that at your earliest convenience you please send me all you can about this, including news accounts and any public statements.

Sincerely,

Harold Weisberg
