Assassinationists are very abundant, the latest being Posner whose book is "Case Closed," and which got a lot of eclat.

However the person who knows more about the JFKilling is Harold Weisberg, who has done 6 books on the subject and whose files are crammed & jammed with thousands of documents.

In rebuttal of Posner he has written Case Open, a copy of which I have asked him to send you.

You would do well to read the book (and perhaps the others that Weisberg may want to send you).

It is a shame that so important a matter has been subjected to variegated conjectures including the misguided movie by Oliver Stone.

With Hoping that you will handle this, I am

Yours sincerely,
