Dear Jeff, *Boyle*

I've given your book to the Hood College library. They are glad to ~~have~~ have it for their black history ^{and} studies section.

On another matter, the indications are that publishers plan to commemorate the coming 30th JFK assassination anniversary with a flood of slop. In general I try to keep up, ~~am~~ can't with all of it, and am not the recipient of any information from publishers.

If any information about any of these books comes to your attention or is in what you read I'll appreciate copies.

I have particular interest in one because that irrational man has made up all sorts of insanities about me. He is Harrison Livingstone, his book is Killers of or Killing the Truth. ^{Publisher "}Carroll & Graf, 260 Fifth Ave., New York 10001. *Can you ask them*

If they'll give you any advance or promotional information and later a review copy (which unless it is early do not send to me) that also could be helpful.

The publisher told PW that the book says we aided the conspiracy to kill JFK and the book will say that. ~~We~~ meaning all critics. *Especially me.*

Makes us accessories, huh?

I ^{*clarified*} hope your situation has ~~clarified~~ and that you ~~happy~~ and doing well.

Thanks and best,

Harold
