

Dear Mr Weisburg

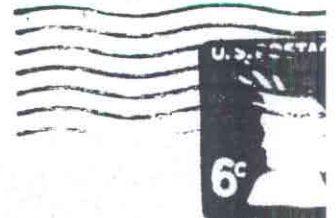

I am afraid to sign my name to this but there are certain facts about the assassinations of the recent years that you should know. A man named Homer Ravenhurst and another named Simon Moon and one who is negro called Hassan Saba X come to Chicago very often from the South probably New Orleans. Hassan Saba X gets the dope and they all smoke it.

This is what is important about the assassinations. All 3 of these men pretend to be leftwing but are really rightwing and they are recruiting people into a secret society called The Illuminat Eye. I have heard them all joke about the assassinations in a very cynical way, if you know what I mean. When they are on dope they will say anything.

All of these names are fictitious but the Homer Ravenhurst one is really named something like Hornly or HERNBY and was a friend of Oswald. Oswald was also in the Illuminat Eye.

I must remain anonymous.

P.S. The Ravenhurst or Hornly has stickers he puts on buildings that say "Sirhan Lives." That will give you an idea.
