

FEDERAL BUREAU OF INVESTIGATION
WASHINGTON, D. C. 20535

To:
FBI, Memphis
Re:
MCKEEIN

Date:
FBI File No. April 29, 1968
Lab. No.

Specimens received

4/5/68

For a complete listing of the evidence, refer to
Laboratory report previously submitted to the
Memphis Office.

Results of examination:

The lead cores of the bullets in the five cartridges,
Q4 through Q8, were found to vary in composition even though
they were all from the same manufacturer.

The core portion of the Q84 bullet fragment from the
victim's body is similar in composition to the lead core of
the bullet in the cartridge designated Q4 and could have come
from a source such as represented by the lead core of the
bullet in Q4.

The bullet jacket portion of specimen Q84 is similar
in composition to the metal of the jackets of the bullets in
the Q4 through Q8 cartridges and could have come from the
source represented by these bullets.
