Dear Paul,

The more time you spend looking for the student in the Valley who had the so-called "Gemstone File" the more time you waste.

I think it is an elaborate puton but it could be a sincere nut who has improvised on all the nut theories and manufactured what he felt would kick a little harder.

He uses crooked sources and adds to them.

Gemstone is too much like Watergate so I've set up a Bruce Roberts file

One has to know the subject to be able to spot some of this.

I'd not be surprised if much could be traced to old issues of the sheets like Midnight.

It also must have been done by one or more who have kept careful files on all the crazy stuff that has been printed.

There is always the possibility that there is something behind all this work that is unreal but sounds attractive.

Stay away from it unless you are curious about who/what is behind it.

If you learn I'd be interested.

Thanks and best,
