

3/12/71

Dear Gary,

If Ned is interested in an appraisal of Roberts and of his role and dependability as a critic of "critics", that touted Newsweek (3/11/71) piece provides a good measure.

What a childish Epsteinism!

To know something about the U-2 a radar operator, with crypto and at least secret clearance, with intimate knowledge of even the then-unknown height-seeking radar, had to have access to the imagers? What did he do with his radar, scratch his crotch.

Without checking the quotes, I think LHO's statement about giving away secrets was more specific.

This is not to suggest that he had any purpose connected with the U-2, for I'd never believed that and thought I'd talked Powers' ghost out of it.

But what kind of repertorial genius is it that lets itself be conned by that access-to-hanger bit? And for a radar operator, to boot!

Didn't the U-2s also fly out of Santa Ana?

No less a diversion is the suggestion that LHO might have "compromised" the U-2. Russian electronics were not that primitive. It was no secret. And there is little doubt their other intelligence told them all they needed to know. I may be wrong, but I think some had downed in China by then anyway.

From what Roberts says (I haven't seen the file yet) there was never any reason for withholding to begin with. I'm not uninclined to believe there is what Roberts didn't understand.

In its more elemental form the reporting is amateur. Example: not 85 "documents" were declassified but many more documents. Files called documents were declassified in two ways: all and part. So, even if it is okay to confuse the word "documents", taken by most to mean a single paper of one or more sheets with the strange use of "Documents" to mean files, not all of each was released.

I don't mean this is nitpicking. With all I'm into now I write only because I like Ned much, he seems both serious and very decent, and I hate a guy like that to be conned by finks. He is like I began, I guess, trusting everybody. But I don't want him at some later date to be asking himself how did he let himself be suckered by the slickers. He might feel badly. Roberts is not the first smooth, polite, sometimes interesting whore, of any kind.
