Dear Jim:

It was a pleasure talking with you today. I am glad that you feel that my work has some merit. I have enclosed a copy of one of my manuscripts. As I said they have changed as I learn more about the case. I have had to change my positioning of one of the fractures because I found out I was looking at a right rather than a left lateral view in the photographs I had before I went into the National Archives and saw the originals which included both lateral views.

I hope you don't mind but I am sending you a copy of a letter I was going to send Harold Weisberg. After talking to him on the phone he said he would not have time enough to devote to it. I have no regular secretary and I invested considerable time typing the letter. It is a pretty thorough account of my thoughts on the case of the head wounds. I hope you find it informative. I will also send a rough videotape of the demonstration I did for the National Association of Medical Examiners meeting. I hope that it arrives undamaged.

I will try to write Vice President Al Gore a letter and tell him about my findings. I do believe this is a new and very significant development in the case and really does prove that there was a shot from the Grassy Knoll and that there was without doubt a conspiracy.

Sincerely,

Randy Robertson MD
