6/11/75* **No CIA link to JFK shooting**

WASHINGTON (AP) — No link has been found to connect the Central Intelligence Agency to the assassination of President John F. Kennedy nor is there believable evidence that he was shot by more than one gunman, the Rockefeller Commission reported Tuesday.

The commission discounted all the major conspiracy theories surrounding the Nov. 22, 1963, murder of President Kennedy in Dallas, Tex.

A detailed analysis of movie film taken at the moment of the shooting and a re-examination of the records of the Kennedy autopsy disprove a contention that the President was shot by a sniper hiding to the right front of the presidential motorcade, the report said.

It also rejected claims that E. Howard Hunt and Frank Sturgis, later to become involved in the Watergate scandal, were placed at the murder scene by photographic evidence.

The Rockefeller commission also said

there is no credible evidence showing that the CIA had any connection whatsoever with Lee Harvey Oswald, identified by the Warren Commission as Kennedy's sole assassin, or with Jack Ruby, the Dallas nightclub owner who shot and killed Oswald.

Critics of the Warren Commission report have long contended that an analysis of the movie film of the murder casts doubt on the conclusion that Kennedy was shot by Oswald firing above and to the rear of the presidential car from a window on the sixth floor of the Texas Book Depository.

The report said that a freshly assembled panel of medical and scientific experts is unanimous in its finding that Kennedy was struck by only two bullets, both of which were fired from the rear "and that there is no medical evidence to support a contention that the President was struck by any bullet coming from any other direction."
