

Dear Howard,

8/13/73

Almost no WC news in this a.m.'s Post may make possible starting another chapter before I go for Lil. When I took her into town this a.m. I got your fat 3class with your 8/8. I'll answer it as I read and go over the appreciated clips carefully when I can. I've skimmed and I may want to ask you to follow the course of the decision on psychological damage as it is appealed, if it is. I doubt it is (national precedent.

Vacation in Jamaica should be great. Learn the duty-free possibilities in advance and try to take enough money. You might, for example, get a Sony tape recorder like mine for less than wholesale in the US and you said you need one.

Glad you found Pritt and find him useful. You appear to describe the work I had in mind. I may have a copy in the books I've not yet unpacked. If so, it is yours. I agree with your belief that you can't write about the Cold War without going back to 1917. To do otherwise would be not to go to the beginning. In your further researches, you might want to dig out the afterthoughts of the US General in charge in Siberia, Graves.

Please do not let the request I made and you can't do naything about be on your mind while you vacation. It should be more than great fun. If you do not plan to use your import-free quota for yourself, remember your dad if he drinks, and if not, then me! a certain amount of liquor is duty free. Whether this falls within the limit that I think is \$100 I don't know. First look out for your own needs, if any. You should be able to learn from your travel agent.

If in your haste to get ready we're not in touch before you go, have a great time. Drink deeply for in a week you can't slowly.

Best,
