Dear Howard,

## 7/1/60

Can it be that for every minute of the two weeks before you left and the four weeks since you have been so very busy, every minute, that you could not let me know your new address?

Have you really been so busy that you have not had time to respond to my asking whether the thing with Fielding is off entirely, whether I should make any effort to speak to him, etc?

Is it that you regard the matter as of no consequence to me?

My prior mailing to your Washington address was not returned. I therefor assume that it did reach you.

I'll send with this those copies I had made of what I thought might interest. I've suspended that because it seems to serve no purpose.

However, in OLC and Criminal Division records I've obtained it is pretty clear that the records sought in 2301-70g later 75-226, did exist, and that in the draft of a letter never sent by Wozencraft the reason given for not providing it is that it was against government policy. This was in 3/67, after enactment but before effective date of FOLA, when there was, howevery the Administrative Practise Act provisions that nobody paid any attention to.

The same records show wholesale non-compliance with my PA requests.

After I filed 2301-70 DJ recommended giving me the information, put as mosting the xase, the FBI agreed, and then it backed out. (I have none of those FBI records yet.)

There was a recent Supreme Yourt decision upholding a judgement for plaintiffs who alleged vexatious harassment by a State. This is why on a couple of records I have added those words. I don't know if the decision includes the federal government.

Best,
