JFK appeal - Feul Rothersel, Jr.

Seconds relating to and originating from Rothermal are relevant to both the JFK case and my El request. By prior appeals so back more than a year and have not been acted on yet. There is inconsistency in the carlier records provided in that what was withhold under one request was in part provided under the other. The nature of the imposphete release is defamatory, misrepresenting my views.

Page three seems to indicate that dethormed was an informat of the Dallas Office at the time he was chief of scourity for H.L. Hunt. He provided information to the DFO in 1968, according to the records partly disclosed earlier.

Prior to the processing of these records there was a sensational series of cases and prosecutions. Crimical charges were placed against Hunts and forcy Forcean, who is charged with taking Burt makey to sell out a client (who could not afford Forcean) in a wire-taying case in which the Burts had Rothersel tayed and Rothersel, A forcer SA, caught them.

Part of the lant defense was that determed was a federal informant.

The correct versions of the neses on page 2 are Braden and Braiding.

What was really referred to in this garbled information is factual - the discovery of threats against the President prior to his going to Dallas. I have referred to the fact that those threats were known in connection with the William Walter natter.

There are relevant underlying records I have not seen in what was provided from FRING and I am cortain was not provided from Dellas files.
