Dear Mrs. Porter,

If you decide to try to get copies of Lee's income tax records you may find use for the enclosed records, which I have just received from the FBI.

The letter accompanied the records. It reflects the fact that the records I was sent that did not originate with the FBI were referred to the originating agency for permission to disclose them to me.

The other record is a page of what is called inventory worksheets. These are used to inventory records pertinent in an FOIA request. Originally these records were processed for me in July, 1978, when all but the first one were withheld and referred to IRS.

The file number, 44-1639 is that of the Dallas FBI's Ruby file. The 1-A represents the sub-~~XXXX~~ file in which these records are filed.

The records now disclosed to me, as you can see, are an additional Jack Ruby return and those of three relatives of his and two of his friends.

Sincerely,

Harold Weisberg
