

December 5, '63
UNITED STATES SENATE
MEMORANDUM

Warren asked about C.I.A.

"Did they have anything"

When I told of Mexico and *said*
Nicaragua NOT mentioning Sums -

He mentioned 5 G as McCone
had told me. He knew all I
did and more about CIA.

Something strange is happening -

W. and Katzenbach know all about

F.B.I. and they are apparently
[illegible] and others

planning to show Oswald
only one who even considered -

This to me is untenable
position- I must insist on
outside Counsel-

"Remember Warren's blanket
indictment of South-"

that there

is clear and definite evidence connecting any person or group

in conspiracy with Oswald to assassinate the President, there

are some aspects of this case that I cannot decide with absolute certainty due to the fact that any such evidence, if it exists,

is beyond the reach of the Commission or the investigative agencies

of the United States.

There are, however, several bits of evidence

that have raised questions in my mind that are not answered or

explained by any evidence the Commission could procure.

Among these are the extent of Oswald's associations and connections with the large number of Cuban nationals who were students

in the educational institutions in Mexico during his residence there;

the nature and extent of his relationship with foreign nationals who

may have had a purpose in Washington during the Presidency of the United

States, the scope and number of communications he may have had with

I do not share the finding of the Commission to the probability that both President Kennedy and Governor Connally struck by the same bullet. The expert testimony based on measurements and surveys, including re-enactment of the motortrip of the Presidential party on that fateful November 22nd presents a persuasive case. However, the movement of one of the victims by either leaning forward or to either side or rising a few inches from his seat would have made a considerable difference in the mathematical computations.

I join my colleagues in the belief that three shots were fired but, to me, the testimony of Governor Connally that he heard the first shot fired and strike the President and turned before he himself was wounded makes more logical sense. Viewing the Zapruder film several times adds to a finding that the first and the second shot wounded Governor Connally.

ASSASSINATION COMMISSION

to my conviction that the bullet that passed through Governor Connally's body was not the same bullet as that which passed through the President's back and neck.

In addition, from carefully examining the site where the tragedy occurred, I am convinced that any marksman firing from the sixth floor of the Texas Schoolbook Depository Building who could shoot with the deadly accuracy which caused the wounds suffered by President Kennedy would have been highly unlikely to have fired a shot that completely missed the other occupants of the President's automobile or the automobile itself. The fact that no trace of a bullet was found either on the automobile or several feet of paved street on each side of the Presidential car is convincing evidence that all three shots fired by the assassin found their targets in the bodies of the President and the Governor of Texas.
