

9/29/75

Dear Dick,

They've renumbered the routes again. We are now on 12, without having moved.

I'm in a real time bind on getting another book out so I can't really respond to your 9/23 except to say I hope the move works out well for you all.

What my situation will be when I'm in the middle of getting a book out with real time pressures I can't say.

But give me a call when you are nearby. I have a lecture bureau now and have a speech for about the time you mention, far away. Only with planes it is not that far.

From your experience in the "security consultant" business, do you know anything about Security Associates International, headquartered in Puerto Rico, with Houston and Dallas branches? They are supposedly about to make an announcement of having "solved" the crime. The FBI did it. They have an unidentified client. What little they have said other than this is all public so it looks like a fake.

They went public several months ago, unusual for that business.

Best,

Denver, Colo.

Frederick, Md. 21701

Dear Hal:

Hello again, how are you and your wife? I heard about your recent major victory re FBI file release data. I am in occassinnal contact with Harv Morgan.

Briefly, I will update you on me: After over two years in San Francisco, we spent three months in L.A. on a job that didn't work out. We came here thirteen months ago to "regroup". Since then, we have had three residences and three work situations. The first was as a "Security Consultant" (Sales Rep) with a security company here. That was three months. Then as a sales rep/trainee with a gold & silver brokerage house now in trouble with the law. Then I got together with a very bright younger investment banker and corporate merger and aquisition specialist with whom I am now working (since January unofficially and since April formally). I have also gotten very deep into "survival" (the industry) and developed some really good information and sources/contacts here and elsewhere around.

Linde and Richard, Jr. ("Doo Doo", now age six and in school) are with me and fine. We don't have any money (yet) but have survived in spite of all the "file problems" and other problems (FBI et al).

I note with considerable interest all thats currently coming down, and "going up" re the JFK and other assassinations following Watergate and recent CIA/Assassinationn revelations and the preassures now building up for a complete re-investigation of the whole thing. There is a reference to the "mafia contract" on Garrison in a recent national publication I noted but no names given except one. They also identify Bill Boxley as "William Wood", a former CIA field agent for two years around 1953 noting that EX-CIA people SOMETIMES make the best critics, and I personally know several.

I am planning on coming to Washington with several associates next month on some pretty heavy stuff some security related and involving some of the "good guys" in the government and military (there are still some around but not very many) and intelligence centers. If you are available, I would like to stop by and see you briefly. Hoping also to get one day to go to NYC and another to Williamsberg.

Re Jerry Bryant (the Lee Harvey Oswald look alike here): I have - loated a snapshot of him and can copy it with a poloroid if I sign a release and I have contacts for locating Bryant who may be back in Denver according to an information received some months ago. Will send you a copy of the snap when I get it and you can see.

Very sincerely,

P.O. Box 1412 Denver, Colo. 80201 303/238-6448 Pg593
