

Dear Mr. Weisberg

Please send me information about the books you have available. Have you published the C.I.A. Book yet?

I am 15 years old and have studied the JFK assassination for 3 years. I have yet to find anyone younger than me that has studied the JFK assassination to the extent I have, therefore I consider myself one of the youngest "scavengers" or "critics" of the Warren Report. I have read around 25 books on the subject including three of yours, I have gone to Dealey Plaza in Dallas and taken a number of photographs, I record any specials etc. on t.v. radio, about the assassination and have built up a pretty good sized assassination library. I would very much like to join a club or something dealing with the assassination of J.F.K., if you have info on any such organizations, send it along!

Thank You Very much

Mike Swickey

Dear Mike,

You have every reason to be as proud as your letter indicates.

If what you have done for one of your age is unusual, it is not unique.

This is encouraging to me.

A new book, just out, Presumed Guilty, by Howard Roffman (Fairleigh-Dickinson University Press), was originally written when Howard was your age!

Ordinarily I am too busy to engage in all the correspondence I might enjoy. I now also have pneumonia and pleurisy, so I must restrict myself even more. For the most part I can't tell individuals about my work other than through the books.

I can understand your interest in a club or something like it but there is none and I know of no committee of any kind, existing or of the past, that I could recommend. Most spread propaganda or disinformation. Stay away from them, please.

It may be a bit lonely but your mind will not be corrupted by the errors and worse of those older, those you are likely to take at face value when it is not warranted.

You will be better able to discriminate between truth and fiction on your own, applying your own critical faculties as you read.

Best of luck!

Harold Weisberg
