## 7/25/75

Please excuse brevity. Tired \& someone coming soon.
Sorry about your troubles, more for what it represents to denied students than to me. Is that a way to rum an "educational" institution?

KDKA: Thought I did show by radio (with no or Virtually no orders from it).
All I can have sald is that I could not make a trijg to do a show. I do them by phone when the phone rings. That is, if it rings for that purpose.

Haybe it wes another Pgh station. But I'll do it by phone any time and I'11 talk about WWIV, which is all fresh there and currently topical bocause of the new reason to believe CIA perjury (思bug hrgs). Or the spectro/NAA suit. Almost anything, with the one stipulation that the sudience be told how to get the books and the price. With them not in stores without this it becomes a futility. However, all radio stations to date, more than 100, have done this. Futility for audience, too, and often problem for stations, which then get calls then can t answer.

Nothing new. Thanks and best,
$7 / 22 / 75$
Dear Harold,
Once again the unveraity administrates have ignored what letter common seise they have and implemented some more "red tape". I stopped at the bbrary yesterday to run Kinsey through the data-bank and was told I couldst use the terminal because I warrant attending classes "at that point in tue.". It seems that someone has come up with a new policy restricting use of the computer to students presently registered for classes. It dudnt matter that I had my student I.D and min Foll term registration card, they sard that was No good until I actually started attending classes. There were several graduate students There who were trying $\rightarrow 0$ get a head start on research fir the Fall classes and they wouldent even let them use it. We all gat together and went up to the Deans to complain but all he dud wis read us the new policy statement and tell wo There was nothing he could do. Nobody even Knows who made the decision. Man, what a rup-off!

As a result, I had to rely on the printed mex, which set as detailed. I did find an up-dated obituary index, but he's not there. Evidently the Times Audit carry his obit. I also Checked the Congressumal Records index fir born sulyect a committee listing and found nothing because that index w also incomplete. If you can wait for the information until I start cases The beginning of Sept.

Ill rue A Through the computer then. Ism really sorry you had to wart for Nothing. When I start back m Sept., I'm going to raise hell with The student gait over why I was not permitted to use a university facility even when I had proof that I was a continuing students.

I was talking to a guy who dies a talk show here on KDKA radio. He said he hat talked to yow about doing the show but your really too busy rught now. I sure hope you can do the show. sometime because, so far, every tome he's done a show on the assassination he comes up with Cyul Wecht for the guest. For The people around here who are really interested $m$ the subject, yow would be a cuelcome relief from Wecht's diatribes.

Best,
Karen
