

Pierre Salinger is an 'inside' political novelist with a difference.

He's been inside.

Pierre Salinger started twenty-five years ago as a reporter for the *San Francisco Chronicle*. By the mid-50s, he was an investigative reporter for a leading national magazine—and then a top investigator for a Congressional committee. He spent three years in the White House as Press Secretary to Presidents Kennedy and Johnson, and served in 1964 as U.S. Senator from California.

So when Pierre Salinger writes a novel about what really happens in government, you know this is the way power *is* wielded by the President, his Cabinet, his Chiefs of Staff. You know that the destiny of a small country *can* be manipulated this way by Americans, Russians, and Chinese. You know that this is how organized crime *might* interfere in a world crisis.

"He has utilized what are obviously some memorable vibes from high-level crisis talks," says the *Kirkus Reviews*; "the cabinet and consular in-chat is convincing . . . the press statements fairly chime with accuracy." The result, says Arthur Schlesinger, Jr., is "a highly enjoyable political thriller, informed by an astute understanding of the way things work—and don't work—in the American government."
