3/1/93

Dear David,

Not having heard from you since all the illnesses assaulted you and your family, and not knowing ~~how~~ why, and with more than enough to keep me more than merely busy, I've not written you even though there were matters about which I thought that perhaps I should.

In your interest and perhaps in Rick's because he is lustily engaged in a rabid insanity with which Livingstone is doing much harm.

Whatever else he is doing he has written Mary Ferrell and me outrageous and menacing letters. I almost sent you the one, rather the last one he wrote me. I did not because I believed that if you were not involved you would not want to be.

Last evening I was read the frightfully irrational and overtly threatening letter he wrote Ferrell about the time he last wrote me.

She has been and is being treated for the panic attacks she has suffered since then.

While I have no reason to believe that you are still associated with him he regularly boasts about two police departments working with him, Baltimore and Dallas, and about an <sup>alleged</sup> coming State of Maryland criminal case,

To now I have done nothing except try to respond to his earlier assaults and that effort having accomplished nothing I ignored his last menacing and threatening letter.

The intensity of his irrationality and falsifications in his letter to Ferrell may make it necessary to do something. I do not want to and do not intend it. For one thing, if Rick is still a policeman I doubt the department would look with favor on what he is involved ~~and~~ in and Livingstone has <sup>again</sup> ~~just~~ <sup>him</sup> involved ~~in~~ in.

I of course do not want you to suffer. So, I write to ask if you have any current or recent involvement. I have no reason to believe you do or that you have recently but I would like to know because it is possible that Livingstone will leave his victims no course other than to defend themselves.

We hope you are all well again and that all goes well with all of you.

Sincerely,

Harold Weisberg
