Dear Gary,

While I presume that if you were going to be able to meet me in Detreit I'd have heard by new, on the chance either letter was delayed these are the arrangements for me:

I'll be getting there are 12:19 p.m. 2/9 en Northwest #319 and will be met by their sedam. It will take me to Scuthfield, where the station actually is. (WKBD-TV)

The taping is scheduled for 5 p.m. new.

I suppose they'll take is so to where they've put so up, at the Southfield Heliday Iss, which appears to be sear the station.

The return flight is Northwest 316, leaving at 8 a/m., so I guess I'll be up as early as usual.

James A Meleskek is the Producer-Director of the "on Gorden Show, 313/444-8500.

If I have received them by them I'll be taking the new CIA releases to read. They should have been here by new. If they relate to you I'll flag those in the event you want copies and do not want to buy the entire release. But as a double check you might ask for those pages that relate to you new that their alleged search is completed and the papers disclosed. They charge 10¢ a page. The request goes to Gene Wilson, FOIA/PA Coordinator, CIA, DC 20505. Hech has them all if you want copies of all cheapest way. By belief is that the more of us who go ever them the more we can learn, especially about what I amticipate, the obliterated names. They have not released all. I have about this many pages not from them.

While from the weather none of the recent weeks have been easy, the past one has been more difficult because I discovered that I had put on more weight than the maker of the supports says is safe for them. This worried me because I must wear them. I've been measured for new ones. Tuesday I had a period of dizziness and other such manifestations and was able to see a local dector. Although the sensations had passed off by them he did determine that it was not what I suspected, anxiety. But according to out bath scale - and I have trouble believing it - I've lost four pounds in the week. This does, barely, bring me within the "safe" range. I can't believe it because I have caten and drunk no loss except that my coffee intake is up some.

Best,
