

ARE TWO SOLUTIONS BETTER THAN ONE? Haha!
**TWO GROUPS CLAIM TO HAVE
CRACKED KENNEDY CASE**

~~THESE~~ THESE "ASSASSINS" GROW ON TREES!

[ENS] Two different and apparently unconnected groups in the US claim to have cracked the John Kennedy assassination case.

A Houston private detective agency with headquarters in Puerto Rico announced last week that its investigation has turned up "considerable new information" proving that Lee Harvey Oswald "did not shoot the president or anybody else in Dallas".

Information about the firm, Security Associates International, is sparse but it is regarded as a reputable company and has been in Houston for two years and has done business with the oil and chemical industries.

The firm says it was hired two years ago to look into the Kennedy assassination but refuses to name its client or clients.

SAI spokesperson Pepper Crowder stated their evidence proves that "the single-bullet theory as reported by the Warren Commission is incorrect". "Certain federal agencies were involved in an assassination conspiracy", he added.

Crowder said the agency is still carrying out its research and will compile a final report in about four months. He added that the information gathered by the agency will be made public.

In an even more dramatic set of revelations, comedian-social activist Dick Gregory said last week that his investigators not only know who assassinated the president but have located one of the assassins.

Gregory says the man is one of three who fired shots at the President in Dallas, and is a former CIA agent with extensive ties to the Soviet Secret Police, the KGB.

Gregory says the man is willing to testify about the assassination to congressional investigators, but only if he's granted immunity from any sort of prosecution. He says the man is not as concerned about murder charges as about being charged with treason for his soviet ties. Treason is punishable by death.

Gregory claims that the man can name everyone involved in the Kennedy assassination.

Gregory also says that last

Thursday he met with attorneys at the U.S. Justice Department to discuss a possible conspiracy to assassinate Martin Luther King. He says he turned over information relating to a young jail inmate who allegedly heard a conversation of fellow inmates plotting the assassination.

The Justice Department has confirmed both meetings and says the matter is being taken seriously.
