2/16/91

Dear Chip,

In looking at your address I see that the zip code is that of another friend of mine out there you may want to meet, a writer on The Finelli Brothers(?), Brobert Bruce, 13237 Morrison St. Fine fellow, too. He has kept me informed re: Oliver stone by clippings.

I need and have looked all over for and cannot find the stenographic transcripts of the Ray evidentiary hear<sup>ings</sup> and I need them. I do not recall whether you borrowed them but if you did and returned them do you recall where you put them? Or where you put that- ever you borrowed, which might be a clue to me. Or if you saw them, where they were?

All indications I have, which is quite incomplete, is that Stone is going to draw entirely on the nut stuff and is under the solok influence of those I regard as nuts. Robert sent me clippings from the LA Times and Hollywood Reporter indicating this.

So, that leaves a serious job open and can benefit any serious work because he is going to ruin his reputation on this. I think you know people who expressed an interest in a documentary for the future so I report this.

I am interested in anything you see or hear about Stone's "Project for 1991."  
Hope you both are well and happy.

We are OK, for us, this coldest day of the year.

Thanks and best from us both,

Harold

Harold
