Dear Mr. Morley.

If I remember at all correctly, some time ago when I wrote you I tried to give you to understand that contrary to what the major media has been saying for years, there are JFK assassination books that do not theorize conspiracies. It is true that most and all the best ones do that. But not all do.

The line, I believe, is intended to put down all criticism of what to me is the official assassination mythology.

The enclosed book is made up of ^{mostly} selections from the four books of my Whitewash series and Post Mortem.

I had nothing to do with the selections.

As I remember the proofs, which I read some time ago, most comes from the first of the Whitewash series and Post Mortem.

Best wishes,

Harold Weisberg
