Date 11/26/63

At approximately 3 p.m. on November 22, 1963, following the President's announced assassination, it was ascertained that Air Force One, the President's jet, was returning from Love Field, Dallas, Texas, flying the body back to Andrews Air Force Base, Camp Springs, Maryland. SAs FRANCIS X. O'NEILL, JR. and JAMES W. SIBERT proceeded to Andrews Air Force Base to handle any matters which would fall within the jurisdiction of the Federal Bureau of Investigation, inasmuch as it was anticipated that a large group of both military and civilian personnel assigned to the Base would congregate at Base Operations to witness the landing of this flight.

Lt. Col. ROBERT T. BEST, Director of Law Enforcement and Security, advised the President's plane would arrive at 5:25 p.m. Subsequently, Col. BEST advised that the plane would arrive at 6:05 p.m.

At approximately 5:55 p.m. agents were advised through the Hyattsville Resident Agency that the Bureau had instructed that the agents accompany the body to the National Naval Medical Center, Bethesda, Maryland, to stay with the body and to obtain bullets reportedly in the President's body.

Immediately agents contacted Mr. JAMES ROWLEY, the Director of the U. S. Secret Service, identified themselves and made Mr. ROWLEY aware of our aforementioned instruction. Immediately following the plane's landing, Mr. ROWLEY arranged seating for Bureau agents in the third car of the White House motorcade which followed the ambulance containing the President's body to the Naval Medical Center, Bethesda, Maryland.

On arrival at the Medical Center, the ambulance stopped in front of the main entrance, at which time Mrs. JACQUELINE KENNEDY and Attorney General ROBERT KENNEDY embarked from the ambulance and entered the building. The ambulance was thereafter driven around to the rear entrance where the President's body was removed and taken into an autopsy room. Bureau agents assisted in the moving of the casket to the autopsy room. A tight security was immediately placed around the autopsy room by the Naval facility and the U. S. Secret Service. Bureau agents made contact with Mr. ROY KELLERMAN, the Assistant Secret Service Agent in Charge of the White House Detail, and advised him of the Bureau's interest in this matter.

On 11/22/63 at Bethesda, Maryland File # 89-30

by SAs FRANCIS X. O'NEILL, JR.; Date dictated 11/26/63
JAMES W. SIBERT : dfl

This document contains neither recommendations nor conclusions of the FBI. It is the property of the FBI and is loaned to your agency; it and its contents are not to be distributed outside your agency.

He advised that he had already received instructions from Director ROWLEY as to the presence of Bureau agents. It will be noted that aforementioned Bureau agents, Mr. ROY KELLERMAN, Mr. WILLIAM GREER and Mr. WILLIAM O'LEARY, Secret Service agents, were the only personnel other than medical personnel present during the autopsy.

The following individuals attended the autopsy:

Adm. C. B. HOLLOWAY, U. S. Navy, Commanding Officer of the U. S. Naval Medical Center, Bethesda;

Adm. BERKLEY, U. S. Navy, the President's personal physician;

Commander JAMES J. HUMES, Chief Pathologist, Bethesda Naval Hospital, who conducted autopsy;

Capt. JAMES H. STONER, JR., Commanding Officer, U. S. Naval Medical School, Bethesda;

Mr. JOHN T. STRINGER, JR., Medical photographer;

JAMES H. EBERSOLE;

LLOYD E. RAHBS;

J. T. BOZWELL;

J. G. RUDNICKI;

PAUL K. O'CONNOR;

J. C. JENKINS;

JERROL F. CRESTER;

EDWARD F. REED;

JAMES METZLER.

During the course of the autopsy, Lt. Col. P. FINCK, U. S. Army Armed Forces Institute of Pathology, arrived to assist Commander HUMES in the autopsy. In addition, Lt. Cmdr. GREGG CROSS and Captain DAVID OSBORNE, Chief of Surgery, entered the autopsy room.

203
Major General WHLE, Commanding Officer of U. S. Military District, Washington, D.C., entered the autopsy room to ascertain from the Secret Service arrangements concerning the

transportation of the President's body back to the White House. AMC CHESTER H. BOYERS, U. S. Navy, visited the autopsy room during the final stages of such to type receipts given by FBI and Secret Service for items obtained.

At the termination of the autopsy, the following personnel from Gawler's Funeral Home entered the autopsy room to prepare the President's body for burial:

JOHN VAN HAESEN
EDWIN STROBLE
THOMAS ROBINSON
Mr. HAGEN

Brigadier General GODFREY McHUGH, Air Force Military Aid to the President, was also present, as was Dr. GEORGE BAKEMAN, U. S. Navy.

Arrangements were made... for the performance of the autopsy by the U. S. Navy and Secret Service.

The President's body was removed from the casket in which it had been transported and was placed on the autopsy table, at which time the complete body was wrapped in a sheet and the head area contained an additional wrapping which was saturated with blood. Following the removal of the wrapping, it was ascertained that the President's clothing had been removed and it was also apparent that a tracheotomy had been performed, as well as surgery of the head area, namely, in the top of the skull. All personnel with the exception of medical officers needed in the taking of photographs and X-Rays were requested to leave the autopsy room and remain in an adjacent room.

Upon completion of X-Rays and photographs, the first incision was made at 8:15 p.m. X-Rays of the brain area which were developed and returned to the autopsy room disclosed a path of a missile which appeared to enter the back of the skull and the path of the disintegrated fragments could be observed along the right side of the skull. The largest section of this missile as portrayed by X-Ray appeared to be behind the right frontal sinus. The next largest fragment appeared to be at the rear of the skull at the juncture of the skull bone.

The Chief Pathologist advised approximately 40 particles of disintegrated bullet and smudges indicated that the projectile had fragmented while passing through the skull region.

During the autopsy inspection of the area of the brain, two fragments of metal were removed by Dr. HUMES, namely, one fragment measuring 7 x 2 millimeters, which was removed from the right side of the brain. An additional fragment of metal measuring 1 x 3 millimeters was also removed from this area, both of which were placed in a glass jar containing a black metal top which were thereafter marked for identification and following the signing of a proper receipt were transported by Bureau agents to the FBI Laboratory.

During the latter stages of this autopsy, Dr. HUMES located an opening which appeared to be a bullet hole which was below the shoulders and two inches to the right of the middle line of the spinal column.

This opening was probed by Dr. HUMES with the finger, at which time it was determined that the trajectory of the missile entering at this point had entered at a downward position of 45 to 60 degrees. Further probing determined that the distance travelled by this missile was a short distance inasmuch as the end of the opening could be felt with the finger.

Inasmuch as no complete bullet of any size could be located in the brain area and likewise no bullet could be located in the back or any other area of the body as determined by total body X-Rays and inspection revealing there was no point of exit, the individuals performing the autopsy were at a loss to explain why they could find no bullets.

A call was made by Bureau agents to the Firearms Section of the FBI Laboratory, at which time SA CHARLES L. KILLION advised that the Laboratory had received through Secret Service Agent RICHARD JOHNSON a bullet which had reportedly been found on a stretcher in the emergency room of Parkland Hospital, Dallas, Texas. This stretcher had also contained a stethoscope and pair of rubber gloves. Agent JOHNSON had advised the Laboratory that it had not been ascertained whether or not this was the stretcher which had been used to transport the body of President KENNEDY. Agent KILLION further described this bullet as pertaining to a 6.5 millimeter rifle which would be approximately a 25 caliber rifle and that this bullet consisted of a copper alloy full jacket.

Immediately following receipt of this information, this was made available to Dr. HUMES who advised that in his opinion this accounted for no bullet being located which had entered
