

Ed, now that Skolnick is back and the press, not just radio, looks for entertainment, I think we can expect every disclosure to be another "vindication" of him (read only him). He "discovered" that Hunt was a courier like he invented sex. However, he is as shrewd as he is, tragically, crazy. These little squibs people do see and they do take them to mean that he alone did see and understand, read is right. That also is tragic. HW 4/13/73
