Section 20

Great that you sint up the Slolnick-HHJ transcript. I use most of my dwindling supply of 3M period to copy it. I then annotated that copy and honed KHJ not anying now I got it. They are going to reread transcript and I am to phone them again pursuant to this proposition: they eir me in refutation of what is in the transcript only, sending me and Skolnick tapes, and giving him my challenge to a direct, live donfrontation by conference phone to be aired without editing.

5/25/70

We'll see what happens. They are reluctent because it makes them look bad, but I think I've persuaded them it doesn't but even if it does they'll look worse if they do not air the other side. I', sending the transcript directly to Dick, for you said that when I returned it to you, you'd send it to him. At some time in the future I'd like a clean copy which would have no markings I added in case I want to use it in facaimile. I had to ennotate it on the chance they'd air me when I phoned. This has happened before.

You might ask again for the references to the CDs. It might be important. You can be assured Fred and "ifton work together, for whatever purposes. What Lifton is offering you is, as I indicated, dated and worthless, but unless there is something else you sant more, I suggest you accept it. I'd very much like a copy of his six-page self-glorification so I can determine what he is up to and what perts may present jeopardy. I suggest you send one to Dick also with his esking, and thermofexes will do. This will cost you almost nothing.

That the documents attached to the suit seem not to be directly from COUP is for this reason: I asked another to make the same requests I did of the Archives, on the chance they's get what I didn't or that they'd get more immediate service. They added certain markings to their copies and then made a copies for me. When I sent Russ copies of the docs to help him investigate for me, I used these which were duplicates where I had them, now a fortunate accident. Incidently, Huss, who knows nothing about the Archives and misunderstood me, wrote on what Skolnick used as Exhibit I that this had just been declassified by the Areivas within the pest six months or so. Obviously. S didn't want that in his suit. Exemine his ex m and you'll see he cut the entire FBI letterhead off so he culd protend i was his onw (nonexistent) investigation that turned up this startling "new information", and all that about the non-existent index. Want more? I'M just not taking time for it. The same is true about the Chicago docs, where he not only reproduced an edded mark but even used the same wrong sequences in which I had accidently stapled them. Johnson confirms he never asked Archives ever for anything. Bud is Skolnick's source on Hurt, but not as Skolnick used it. I've had this for at least two years. Hurt's only intelligence connection was WWII, solider, and be has spent most of the time since then in various troubkes and institutions. He must have phoned LHO collect, a contingency for which the forms do not provide. Bud got this by accident and coincidence and it is not in any official records because the person who gave it to him get it from the other phone operator, who took it from the wastebesket as a souvenir and in so doing got the wrong form. Or, you might write Skolnick and ask him the CD question end let him refer tou to the suit, then ask agains not for that number but for the CD identification, telling him the second time you'd like to get your own clearer copies and see if you can find more because of your own fam blierity with the Archives ... The friend, who was a good one and a fine guy, may no longer be. Perhaps you can now better understand some of the potential for the alert but underinformed in certain a spects and some kinds of relationships.

Dicks mailings postmarked 19,20, here. No mail embrage as of this minute Mayhew: you were right, I've had no answer either. Methinks his interest is ganzerschmajastryou and fleisch. Fragmentation: I meant if fragmentation took place aft r hit, as

of bone. Bieberdorff: complete servient. As iI recall without chekking, this is what I said. I'll check when I and, and I've out this with the test citations and poss interpertations of them.

There is more on the Ray suit, like non-delibery documents, which pleases me much. They are writing a record called "Paint Myself Blacker".

Mayhew again: you reasoning was correct, mine, based upon the inferences he has a relative who was in the SS escort and this is part of the reason for his expressed doubts, was wrong and now seems to be proved so.

Nothing else newsworthy.
