Dr. James Shoads archivist of the Smited States Cashington, D.C.

Cear I. Choads,

copy of CD 47:8 and 9, a duplicate of CD 47:8 and three copies of CD47:7, each from a different XP file, but no response to the questions I saked.

with the utter chaos built into these files, we you have personally acknowledged to be the case to me. I can conceive of no way in which this information can be elicited except by the seking of questions, particularly because this is, as is must be, a classified file and researchers cannot go from one file to electer on hunch, do not have unrestricted access to the files, and cannot wander through them at will.

The validity of my questions is established by CD47:E, the last sentence of the first persgraph of which leaves no doubt there was an FBI investigation of the license number 3110RF, as I had deduced. If the FBI itself reports with Wenial that it had "frozen" information to a men it so studiously leaves unidentified but who I believe to be no less than a captein in the New York lity "olice Pepartment, it is clear its interest was rether intensive. Now if it had such on investigation, which would appear, by its own reports to be the case, either you have them or the documents were denied the Warren Commission. In either case they are and under existing orders must be swellable to you, must be in this rchive. In my cess, I believe they should be available to be. If you do not have them I gain engage in what you have abundantly established as a futility and est you to request them for your archive. In the remote event you decide this is to be the meningful, distorical archive the entire country has been declive into believing it is, when you get response or the files, I would like to be informed and to have copies.

I note your continuing refusal to supply me with either a copy of the memorandum of transfer referred to in the sutopsy panel report or a reason for benying it to me, notespreaching a third menth in delay, report that it is almost two menths since you personally promised it promptly, in a record that after a cuarter of a year some of the questions I waked - these the mest recentaire without response of any kind, despite your personal assurance that none remained unanswered. If this is your concept of how to be rechivist of the builted tates, I want to help you leave an absolutely clear record of it.

Sincerely,
