Speaking of intestinal fortitude, legal researcher Sherman Skolnick's revelation that the Guru Maharaj Ji may in fact be not 15, but 30 years old should be of interest to horticulturists. Alleging that the Guru is just part of secret CIA-cum-press agent Rennie Davis's "bag of tricks," Sherman says the doctors determined the age discrepancy by examining the Guru's intestines. One of them was a tree surgeon who just counted the rings around his colon. On a serious note, Sherman summed up the Guru's and Rennie's gameplan: "It appears they are trying to take over the young spiritual movement."
