

12/16/97

Dear Earl,

Last I heard from you you'd ask if you might bring someone who works for the FBI with ^{you} ~~my~~. I said he'd be welcome.

It did not occur to me until you did not come that someone who works ^{for} ~~for~~ the FBI would consult their files.

There he would find a collection of what ranges from misrepresentations and distortions to outright lies about me.

If something like that happened I suggest you might want to consult the records that will reflect the truth, here.

In what I refer to the "subject" files in the basement I have a fairly wide selection of those FBI labels in files under my name so that anyone using those files, and as you know all such uses ~~are~~ unsupervised, would be able to see a selection of them and then, if interested, ask me about them.

Or leave with only the FBI version.

Enclosed is the Airword for Waketh.

Hope you all have a good holiday,

Sorry about the wrong ribbon. I've about half of a book on paper about the commercialization and exploitation by Sy Hersh, The Dark Side of Camelot. It is thoroughly dishonest, has nothing new and factual in it and is on what is important quite wrong. What I'm writing has the tentative title Faking Kenney: the Dark Side of Sy Hersh.
