

Dear Pearl, You can draw your own conclusions about how normal the enclosed story from 9/6/72 today's Post is consider that it is a repeat of yesterday's Anderson column the Post printed and that Karnow is its SEAsia specialist. You will note that he never once mentions Southeast Asia, only South, which is entirely different. The India stuff is close to pure propaganda, if the rest isn't; and the story is no better than that, given what has been so widely publicized, of which I have sent you only part. It is to make one wonder. The editors of the Post as well as Karnow read what they print, if not what others have, as we know they sure as hell do. They printed a Large Harper's ad on the McCoy book, an answer to the CIA. They printed the only stories I saw on McCoy's Congressional testimony. There is no innocence in the omissions and I think no unawareness of the net result. This is, in addition, a signed piece. There is a big cleanse-the-CIA play on. I cite this story and lend it (please return when you are finished) so you can puzzle your own way out of the cul de sac into which I believe you have been led. Best, HW
