

Dear George,

4/1/79

Only coincidence that I came across this New Orleans record never investigated by the FBI, Commission and I suppose committee, the name "Oswald" on a record of price solicitation for ambulances for anti-Castros.

I went over the New Orleans records I got months ago, my wife made copies as I then indicated them, and I've been too busy in court to go over them.

FDC became Cuban Revolutionary Council. Moore is probably Jose Morejon, who was also known as Jose More and Joseph Moore.

I ~~just~~ just wonder about the "Oswald." There were not that many in N.O. and for any one to have been involved would have been provocative, I think requiring investigation.

If you read Snyder's piece he also has his facts, not that I defend the Epsteins or ~~the~~ Salandrias. Snyder's are of omission, not fabrication.

However, his piece is factually correct, aside perhaps from personal details, which may have been downplayed.

Although mine was the first writing on that subject, and it was extensive enough, he made no reference to it. Lefthanded compliment.

In recent weeks I've gone over many records. There are the kinds of stories that the daily press can't pick up. I'm setting up separate files on some, where they may be of use in my future writing.

There is a funny Hoover story. When his Warren Commission testimony had to be edited all the top brass agreed the court reporter made mistakes. On every page and including one would be led to believe many words His Highness did not speak.

And then it is the Laboratory that does political work, like taping radio and TV shows critical of the official solution.

Some of the stuff they pulled on me backfired, although I then was not aware that the FBI was behind some of it. I did suspect some on the west coast and was right. The FBI's effort to do me in when my first book was first out made it a success in New York and a best-seller there. Oddly, they wound up in tandem with Lane's publisher, who had the same motive.

Channel 5 in Washington also worked along with them then.

They still have much to hide that the committee did not go into.

Sincerely,
