Professor Peter F. Drucker
Social Science Department
Claremont Graduate School

Dear Professor Drucker:

It is refreshing to read in the Wall Street Journal your appraisal of need for economic theory to change. But, dear heart, you have a Pollyannish attitude if you think we are doing the every fifty-year shuffle. Old brother--we are doing the five-hundred-year stomp. Feudalism was dying in 1475 and capitalism, as we know it, is having a coronary occlusion right now:

1. We are heading into the fourth, intentionally created, desperate money crunch in ten years--never before having such a general series of traumatic disasters to all except the multi-national conspirators.
2. Inflation caused by exporting what we do not have a surplus of to a world population increasing at 1 1/2 million mouths per week--is destroying the American standard of living--and this is not an unintended leveling by the Burns-Shultz-Kissinger-Friedman world market boys.
3. A 23-year force, military (C.I.A.) and monetary (Federal Reserve) world program has cumulated into a total failure climaxing with one half of total federal debt originating in eight Nixon years between 1969 and 1977 after an unbelievable and as yet undisclosed "subversion of the political is the fourth dimension of the military" attempt of the power structure.
4. Faced with a capital annual shortage accelerating from \$50 billion annually on to God knows where--we are ruled by a hierarchy dedicated to military related expense consuming 60 to 70% of all non-Social Security federal dollars--where can interest rates go but back to bankruptcy proportions.
5. With 10% unemployed now and heading to a bottomless pit depression (50% ghetto unemployed) with new entries into labor market having no hope--military dictatorship, as General Gavin and Richard Ney suggest, will be demanded by W.A.S.P. great S.M. as soon as riotors start burning.

All this crazy crap is so unnecessary, but on and on it will go, because reform as England achieved from 1815 to 1860 is beyond our concept capability, i.e. Congressional to Parliamentary system--central bank discounting production loans like Japanese with M₁ a Treasury responsibility--a unified drastically changed military relying on ground tactical missiles and submarine strategic missiles without tanks, planes, and WW II tactics, etc.

Sincerely,

Mr. Carl T. Rowan
Publishers Hall Syndicate
30 E. 42nd Street
New York, NY 10017

Dear Mr. Rowan:

In your column--you seem to ridicule those who say the Warren (Ford) Commission was a bedamned lie? "You don't accuse people or governments of murder unless you can prove it"--but deductive sequential evidence does prove it, and putting testimony of all those in position to know from Angleton and Colson to un-named C. I. A. agents also proves it.

The fault lies in the media for news being unwilling to persue the truth--it is too shocking and horrible to be admissible--even the Supreme Court is involved since May 1974 in the cover-up.

The modus-operendi is hypnotism used by secret police in the Lincoln case--and not admissible in court because it would upset the entire judicial system to admit the truth that you or any one can be hypnotized under proper circumstance to do anything, including suicide. James Earl Ray has no idea why he did it--as an example.

You say Liddy and Hunt were in Dallas--how about that charter member of the C. I. A., the great Commie hunter himself in person, R. M. N.? Are you afraid to mention that--Earl Golz (Dallas Morning News) wasn't and a lot of other stuff too, although 100 people have been eliminated in regard to this.

Sincerely,

Charles A. Spears
