Mr. Clarence M. Kelley, Director
Federal Bureau of Investigation
United States Department of Justice
Washington, D. C. 20535

Dear Mr. Kelley:

Subject: Spectrographic examination of bullet fragments
In JFK assassination (PC-78243 BX)

In the hand written laboratory notes sent to me, I note that certain sample bullets were used for comparison purposes and indicated on the attached pages from that report. I would like to know what these samples were, as to caliber, type of design and core and jacket composition.

In addition, in a letter from Dr. Vincent Guinn (see attached), he states that the spectrographic report which your Bureau sent to him, does not contain any readings for Silver, Tin and Bismuth. That sent to me does. I would appreciate a copy of the report which was furnished to Dr. Guinn.

Also, I understand that the Federal Bureau of Investigation had certain of these bullet fragments subjected to NAA examination. Is this material available and if so, may I have a copy of that report? Naturally, I will be glad to pay the cost of copying these documents.

Sincerely,

Emory L Brown, Jr.
