

I, Marion E. Williams, a Special Agent of the Federal Bureau of Investigation, being duly sworn depose as follows:

1. I am an official of the FBI Laboratory and as such I have official access to FBI records.
 2. I have reviewed the FBI Laboratory examinations referred to in the suit entitled "Harold Weisberg v. Department of Justice USDC D. C., Civil Action No. 2301-70," and more specifically, the spectrographic examinations of bullet fragments recovered during the investigation of the assassination of President John F. Kennedy and referred to in paragraphs 6 and 17 of the complaint in said case.
 3. These spectrographic examinations were conducted for law enforcement purposes as a part of the FBI investigation into the assassination. The details of these examinations constitute a part of the investigative file, which was compiled for law enforcement purposes and is maintained by the Federal Bureau of Investigation concerning the investigation of the assassination of President John F. Kennedy.
 4. The investigative file referred to in paragraph "3" above was compiled solely for the official use of U.S. Government personnel. This file is not disclosed by the Federal Bureau of Investigation to persons other than U.S. Government employees on a "need-to-know" basis.
 5. The release of raw data from such investigative files to any and all persons who request them would seriously interfere with the efficient operation of the FBI and with the proper discharge of its important law enforcement responsibilities, since it would open the door to unwarranted invasions of privacy and other possible abuses by persons seeking information from such files. It could lead, for example, to exposure of confidential informants; the disclosure out of context of the names of innocent parties, such as witnesses;
- 

the disclosure of the names of suspected persons on whom criminal justice action is not yet complete; possible blackmail; and, in general, do irreparable damage. Acquiescence to the Plaintiff's request in instant litigation would create a highly dangerous precedent in this regard.
