Ar. Jerry Cohen Los Angeles Times Los Angeles, Ca.

Dear Jorry.

In going over some records to obtained from the FRI this morning I note that what you confirmed to me, that Charles Stein picked up the phone number you traced to the Raton Rouge barracks in the Ray case by looking over Ray's shoulder, is not correct and that you and Dave Larson (also given as Lawson) knew the actual source.

My attention is attracted to this again because in its Through the "ookingglass way the FBI "eleared" Raul Esquivel by not investigating the correct dates.

according to these records you and Lawson/Larson had notes, including a copy he made of the note Stein had. I'd certainly approciate copies of any of this because I believe there has to be some reason for the Fall's not investigating the dates in question.

Civil Rights complaints had been made against Esquivel. The FHI has several files not disclosed on him.

It is very slow going and extraordinarily costly but I am obtaining a very large number of records, as your Jeff Prugh has seen and used. It is an understatement to say that there is substantial doubt about the official story, so I'd appreciate it very much if these things can now be retrieved and copied.

Best wishes.

Herold Weisberg
