12/11/91

Dear George,

In the hope that I can complete this before my transportation to Johns Hopkins for a neurological consultation I believe will not disclose any new medical problems, this hasty update.

I enclose the card nonresponse of Lies of Our Times to the long letter of which I sent you a copy. I've written them at less length but won't be able to read and correct it until after I'm back.

Mark Phillips was here to interview me. He had interviewed Stone. From his statements rather than believing he had to keep the content of his film secret Stone said that from his "research" there were three assassins shooting ~~from six~~ six times. Phillips' questions reflected a proper, neutral approach. He said they expect to air this on Friday's evening news.

Bryan Myers of ABC's Nightline called me last night. After a long conversation he'll call for a specific time later this week for an interview to be used at a time he did not indicate. I presume that program will be on the movie and the controversy.

With both I emphasized that Stone said he will be recording history for the people, telling them who killed their President, why and how, that knowing I alone have 250,000 pages of official records he continued to declare that "all" is suppressed until at least the year 2039, and that long before he started shooting I correctly informed him of the true nature of Harrison's book on which he said he was basing his ^{movie} book and with Myers, the character of Harris that Stone said he also used. I am not sure but I think I told Phillips this, too.

Chris Hanson of Hearst was also here. His story is due day after tomorrow.

If you hear anything at all, please keep me informed. There seems to now be a responsible major-media interest, TV for the first time, and I want to be able to address any new Stone-walling.

Best,

Harris
