

ABC-TV evening news 12/19/97 showed Clinton as garrison as lead-in, channel 7. Channel 4 at 6 pm announced review of "FT" by Tracy Campbell. Both make no further mention until late. Switch from time to other DC station + NBC on ch 2, no mention after yesterday's preview. It is last story on last stations. NBC - with poor reconstruction. not faithful to all - "assessing" - "typical of such store movie." If ABC had anything it had to be so very brief I missed it in switching stations.

Night line opens with garrison making contradictory statement
garrison, me, the night, lost near on wide conspiracy
Blakely and Gibson.

It goes into evidence - single bullet theory - about which I was not asked anything

Robert O would also used. It begins with "no other side."

Stone says files not released, won't be until 2029
Stone says research community "beliefs might be understood
complex behind examination. Stone's argument is that these people
had no motive + that this included FBI + CIA.

Forrest Sawyer vice Ted Rappel
Stone's use of garrison - "I admire your garrison" - "I don't
think he had a fair chance" - uses him as a "metaphor". He cites of
fiction as proof as of Sawyer's "perjury". Sawyer says he had trouble

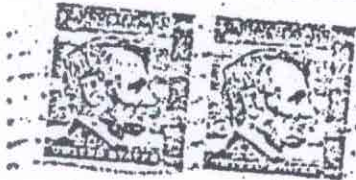

knowing when stone represented fact and did not. argues again "let
the files out" just those of House, then CIA/FBI. Stone never addressed
any thing directly. And this is the whole theory - one little
bit of me + jury

mostly Stone allowed to testify himself

He is allowed to represent that files that are discussed
+ ABC saw and filmed the readings are still withheld
