Basics two TV shows I cautioned you about your glowing endorsament of Tony Summers 4 hts book.

I'vewcrowed a copy, read the first 50 pages and relevant notes, his so-called cast of circters, and checked his index.

It is nork of slickest, most professional dishonesty, as with your intelligence and subjet-atter knowledge you should have perceived.

As a sollar you should have been sware of his avoidance of primary sources and you know from rading the book that he was well acquainted with them.

To the first I've reached, save with Manchester, where he had no alternative and was entirely nexitical, he has credited no author with the work of that author.

This is he standard procedure and method of the literary whores in the field, as by now you also should know.

Where h gives generous credit, it is to one not published, Mary Ferrell, to whom in any eventhe was much indebted — but where it was safe for his posturing. What is pertinent thre, the original analysis of the police tape, is missing. Gary Mack did that work as it is published. So he pretends that the safely credited source, the HSCA, originated it. He has little chaice that to puff the second-handing HSCA because he uses it to avoid all the stolen primary sources and as his own credentials.

In his so-called cost of characters, he does not have Carolyn Armold, his big and uniquely his deal on cost-to-coast TV but he does have the obviously phoney Clark Comer. Comer may be important abough for his cast of characters, but he is not indexed. If you can't trust a book's idex, what can you trust of the book?

If you can't trust a book author's spelling of names in his cast of characters, a shill if there everywas one in any event, what can you trust about the author's knowledge. Idle Ernsty Rodrigues. Or Alvaredo, without the matronymic, which is present in all official record I've seen. What can his sources really be? Strong indication of the second-head and varbal.

and his supposedly generous credits to his former associates, which excludes so many of them - all but Cashy and Scott of those who came here?

Once again, as an old man with more experience, I caution you about getting carried away by emotional involvements, by desires, by seeing what you like and being willing to forget all else isoluding what maybe you don't like. Once again I warn that this kind of whoring destroys the credibility of all serious work and exculpates those who deserve legitimate criticism, like the errant federal agencies.

Sincerely,
