November 18, 1975

Dear Harold,

Senator Schweiker says the Warren Report is about to fall "like a house of cards."

Rumors are that "Time" will come out soon in favor of a new investigation. Your efforts are bearing fruit. My tribute to your work appears in the letters to the Editor, S.F. Chronicle 10-13-75, in commenting on Joseph Bristo's view of a JFK assassination probe as "tawdry".

How about sending a copy of "Post Mortem" to my Congressman Dellums on the House Intelligence Committee? Last weekend he said new, "explosive" information on domestic assassinations would be forthcoming. Your view?

Don Edwards seems interested in probing the FBI's coverup. Maybe a real investigation is finally going to take place within the next six months. I hope your material will reach House investigators. Best wishes,

Garrett  
Timmermans

Thanks for your 11/18. I'd appreciate a clipping of your 10/13/75 letter to the Chronicle.

I've made all the efforts I can with Dellums, Edwards et al. I never could get past the palace guard around Dellums and others, got no responses to letters, and if I spend my time in ways that can succeed I can at least bring more to light.

It is more than likely that those with big and heard mouths and means who have done no real work and take as theirs the work of others may have influenced these Members. However, I am but one man, can do so much, wasted more time in the effort than can ordinarily be justified, so I'm letting them do their things with those with whom they associate. So far Edwards has dirtied his own face, on the record rather than in what gets in the papers. I regret this much. But as long as he can't distinguish those who are using him from those who might help the odds are against anything of real substance coming of this. I'm truly sorry. But now that I'm ill there is even less that I can attempt. Please believe me, my efforts are of the past and were diligent. Thanks, HW 11/22/75
