Dear Mark,

I've read your memo on the Phoenix phone calls and the enclosed FBI reports.

While there are questions, my hunch is that the guy Means told substantially the truth, that there was confusion about the numbers and the time, and that part of the reason for withholding was violation of the law by the phone company, which made its records available without subpoena.

In the original report the time was, obviously, local time. In Phoenix, in the Mountain Time Belt, it was an hour earlier than that moment in Dallas.

I also can't imagine that kind of guy involved in such a plot.

However, if my hunches are wrong, I also can't see how you can hope to carry this farther. So I think your time might be more productively used on other items.

You were going to include two sets of the Arnold Lewis Kessler documents so I could send them to a friend of whom we spoke when you were here. When you do that I'll write him.

Thank and best wishes,
