Dear ilr. Thompson,
Thanizs for your letter of the 6th and enclosures. I've already sent you Post hortem I and III, insured.

Ehat you sau on the $Z$ camora seons right. The rpice is hich, but they wade few and for some unusual rason, is not les: than the fisuro you quote anytwhere of wilich I lnow. Ecept for do luxe features and the pushbotton zom, all those are othorvise identical.

The 10 to 40 filn scale is a film-speed scale only. Thoso wre the ASA ratinge on the films generally used in the duys that camera was made. There were other films, but not in ceneral use. For example, I usod black-and-white 400 -spoed filn before that camera was madc. But in color, those were the ratincs.
Z. did not nake out an affidavit sayin; he was sho tin; at 24 fps . Hy only iistakes are when I trust anybody in governmont. That was what he was quoted as saying in an IMI report I printed. Actually, the fidar speed of that camera is quit variable, because it has a sliding control. It can shout individual frames, can slide from that into 48 Ips, otc. So, we still note really know.

On Post Nortem, I accept you word, and we both interpeet this as no exceptions. There are those you trust who I do not, not because they are crooked but because they liave lost their balance. I don't want any of this usod in any way because tho petential for harm can be preat from partial uso or from misuse.

Huch as I need money, there is to ereat a chance of counter-ppoductive use to warrant sale of mineotraphed copies. And we can't take tine from constructive work for mimoegraphine.

B隹隹eve me, Joesten is insane. He is incapable of orignal work, retails his ow exaggerations of others', or his misunderstandine of others. As of the last evidenco, he didn't evon have the 26 volumes. He knows notling of that of which you wite. nless you want to col ect what belongs in a toilet, hold off on sonding hini $\$ 50.00$ until you see and read what you are getting. .

Vieving the photos is now much less important than you con presently undorstand. Knowledge has advanced far past what most "buffs" can begin to ap reciate.

> Sincerely,
