**Pueblo Captain**

The captain of the U.S. intelligence ship Pueblo was quoted as saying that Americans should become aroused and demand that the U.S. government apologize to North Korea "for the crimes committed by the Pueblo."

Cmdr. Lloyd M. Bucher reportedly made the appeal in an interview with Lionel Martin, a correspondent of the leftist National Guardian published in New York. The report was carried by the Korean Central News Agency and monitored in Tokyo.

In Seoul, it was announced that South Korean troops have killed seven North Korean infiltrators in four clashes along the Demilitarized Zone in the past two days.
