TO : Mr. Conrad

DATE: 3/27/64

FROM : R. H. Jevons

SUBJECT: ASSASSINATION OF PRESIDENT  
JOHN F. KENNEDY; 11/22/63  
DALLAS, TEXAS

*Handwritten initials*

Mr. Melvin Eisenberg, a member of the staff of The President's Commission, telephoned on the afternoon of 3/26/64, and inquired as to whether or not we had finished the Laboratory examinations of the bullets and cartridge cases involved in the murder of Officer J. D. Tippit (Officer Tippit was reportedly shot by Oswald.). My memorandum of 3/26/64, covered the results of these examinations.

Mr. Eisenberg was advised that the firearms examinations and the qualitative analysis (analysis for presence of chemical elements) of the bullet alloys had been completed; however, a qualitative analysis (determination of percentages of the chemical elements) had not been finished. Eisenberg replied that he did not desire the quantitative analysis of the alloys at this time; however, if this aspect proved to be of probative value, he would later request that this be done. The Commission was advised of results of the examinations by letter of 3/27/64.
