## 10/6/68

Dear both,
From your silence, I teke it your departure from NY hes been del ved, I hone by good thinge.

I now $k$ ve to be in NY the $2 \varepsilon n d$. I'll probeblt get there about midday Tuesday the $21 s t$. I shculi be ready to return the evening or night of the 22nd. Whe meetine for which I ar geirs, with an agenent and a puilisner, suoulu be over by 3 p.m. the 2 nad. Of course, it is possible tagt sometaing will come up to meise it desireable that + remin over th nigit o. tie zence.

Homever, if that argroximately coincides with the time of your delpyed ceperture, perhaps mis could come here together?

Ifl continues the slow retyping of the addition to cour. She hes it obdut half completed. It is very long.

Tobsere both okgy, both tired. Bright young feces mill be g lift.
Lately, when possible, ${ }^{\perp}$ as ve been geing to a lccel "community sole", soecine things we need sad cannot eftord. It is an auction to wack reeple send things ticey no leager noed. Irfrequently whet is sold trines more tasn it is worth, sometines much more ta; it cost new. However, it is generally true tast they bring very loti rfices. For example, I need a cord table for the masine-up of the books, somathing essily ztored at other tines. I got two, esch for $\mathrm{t}_{2} .25$, gettinz the poorer on the ch ace I'd not want to go os high as the better pould bring. You cen heve it, if you'd like. I got two fireplace sets for the cost of s aingle sareen or single set of endirons. find we re now hesting the house with nothing but the fireplace. So, if tioere are essential items you think you'll rot be sble to eet et $10 \%$ cost in gitte. waen you get thore, let me kro wast they are and I'll see if trey are available.

Ruse Trunzo is wall hoin to we personsliy, through his omn mors, gidthrough work te has donc for me. on esth bssis i recomend hin hichly, as a perion and es a worber.

Your people nth whom he has ban contsct should know enough sbout his cherecter sn urinciplos for ony exposition to be excessive. tou shoula know, fron those you know, that te is fine fellom.

From eumples of his onn work you should be oble to see, as I heve, tia ability to lcosta inormestion an to use it.

 thoufh alose to impoositie. If you would like, I vill tell you af these thinge, but I'i proter not to record them. In my wry ther inco been Arportant. I thint thay demonetrote a cepecity for ouslyeis, underctanding end delns twet, xith hi: roportcriel kachground, onvince ne he is ideally cuited to cocrin te anc eurervise rezeareh of just abcut any kind, but especinliy the most dificult, recuiring the kinds of perception min sicilis
 with areatest circuspection ond responsibility, fncluang who to lno: to et
 not explicitly escou of hin, becaube he know it wes wonted and neadec.

I moud line very nud to ser this projoct underwo.
