

12/31-in haste- If your Chicago former associates are talking and calling the current stuff on Army intel. esp. the current hearing there, I'd like very much to have it for Rex Rey's lawyers and I think I could place it very well, so well I'd be willing to give it away. If I could sell it, we'd split. It is only reasonable to assume that your former have been covering this all over, and maybe for more than one client. At the same time, if you inquire, you should be more than usually circumspect.

I've gone over the new Vallee stuff again. + haven't time to go into it now, but it could be a real disaster if Skolnick should get it, in several ways, among them being the indications of a trap in what I was given. I've given copies to nobody because there is in in what should not have been made available (maybe bait to get it misused) and there are contradictory explanations of why it was made available. That it is available nobody else should know, for now anybody, including Sk., can get it if he knows how.

Best, n
