## ACKNOWLEDGMENTS

---

From the beginning it was apparent that it would be impractical and an exercise in vanity to attempt to complete this book without help from many people. The scope is just too vast. So I set forth very early to obtain cooperation from other authors whose work I admired and from researchers in the field who had accumulated experience over the many years since the assassination. I was not disappointed in my quest for help. In fact, the relationships with these people would prove to be among the most rewarding aspects of my endeavor. Cooperation was forthcoming from virtually everyone I approached. This ranged from private citizens whose technical and professional skills I sought, to actual witnesses to the assassination, or in the periphery and aftermath. And, surprisingly, I found cooperation from retired government officials who were close to John Kennedy and Lyndon Johnson.

It is impossible for me to express who helped the most. I will begin with one closest to home, living here in San Diego, and go from there. Robert Livingston, M.D., medical scientist and expert on the structure and function of the brain, provided many hours of consultation and advice.

David Mantik, M.D., physicist and radiation oncologist at Eisenhower Memorial Hospital who had access to the autopsy materials in the National Archives, taught me the rudiments of x-ray technology and shared with me the scientific evidence of conspiracy that he developed concerning Kennedy's x-rays. And Louis Kartsonis, M.D., who also had access to the autopsy materials and provided guidance in the early stages of my investigation.

I want to thank David Lifton, author of *Best Evidence*. He provided help in understanding his work and gave constructive criticism on how to write a book of this kind. I hold his pioneer work to be the largest single contribution to the solution of the John F. Kennedy murder mystery. In addition, David Lifton helped me extensively in my analysis of the Zapruder film; he inspired me to give it highest priority when he lectured at a conference in Dallas; he shared his hard-gotten copy of the film with me; he gave me

A special acknowledgment is extended to the retired government officials, military officers, and private citizens who granted me interviews. Their hours of discussions with me shed much-needed light on the circumstances and state of knowledge surrounding the Kennedy assassination within the government in 1963 and to the present day.

My thanks to the hundreds of writers and researchers who have never given up in their efforts to reveal the terrible nature of the crime and its implications for the future of the United States of America. This book is only a continuation of their sacrifices and labor over the past thirty years. Special among these were veteran researchers Robert Dorff, who gave so much time and effort that I have lost account of it; Gary Shaw, author of *Cover-Up*, who provided his advice and his wonderful notes on his interviews with Colonel William Bishop; and Gaeton Fonzi, staff member of the House Select Committee on Assassinations and author of *The Last Investigation*, whose advice and counsel in the last two years was indispensable.

And what can I say to express my thanks to Charles Marler? He volunteered to conduct independent tests and analysis concerning my discovery of the missing frames in the Zapruder film. He worked many hours and weekends at his expense and freely provided me with the results of his tests which confirmed my original experiments.

Those who helped me gave freely of themselves, demonstrating the need of large numbers of American people to get to the truth of the assassination of John F. Kennedy.

But, in the end, the conclusion and judgments that I have reached are my own, and are not attributable to nor endorsed by any of those who helped me along the way.

## PROLOGUE

My viewpoint in writing this book is that of a prosecutor who is convinced of the guilt of the accused but must present a case to the jury and be challenged by an extremely powerful defense—I write as an advocate for the prosecution. In other words, I state clearly up front where I am coming from and what I believe. This is not new:

*I want a man to begin with the conclusion....I look for good solid reasons from the start, which will instruct me in how to sustain their attack.*

—Michel de Montaigne (1533–1592)

So, as you read, my bias will show through just as that of a trial lawyer when he is presenting his case in the courtroom. However—and this is very important—in instances of evidence that are key to reaching major conclusions, *I will present counter-arguments that I can conceive would be mounted by the lawyer for the defense*; included will be the main arguments of Gerald Posner, which I shall rebut.

Posner, the author of the highly advertised book *Case Closed*, is a very smart lawyer. He spent two years working on his case for the defense of the lone-assassin hypothesis. By publishing his book, he provided me with what I thought would be the perfect adversary. I welcomed it. But it turned out that he was an opponent who had not done his homework, thus compelling me to develop even stronger counter-arguments to my case than did Posner.

A method of writing that I will employ is to start the book with a broad brush; that is, to give a picture as simplified as I can of the concept of the crime before plunging into the complexities that must follow. This method will be used for the book as a whole, and for each chapter. I believe the reader will appreciate that there is a constant struggle, in absorbing this vastly complicated material, to separate the forest from the trees. An account describing the forest

✓ Kennedy, the dark forces behind his murder have never been convincingly exposed. In **BLOODY TREASON**, Noel Twyman has written an explosive new explanation of the assassination and its cover-up. This fascinating book lays out powerful evidence that a cabal of extremists and military officers, plotting with gangsters and corrupt government officials, diabolically planned and ordered the crime of the century.

**BLOODY TREASON** is a product of five years of sifting and evaluation of tens of thousands of pages of documents found in the National Archives, and of hundreds of books and papers. It includes first-time interviews with critical witnesses and is updated with the most relevant documents recently released by the Assassination Records Review Board as authorized by Congress. It is the report that the Warren Commission should have written. The result is a major revision of history, one that will forever change our understanding of how and why John F. Kennedy was assassinated.

#### AMONG THE BOOK'S HIGHLIGHTS:

- In a devastating indictment, Twyman tells how and why President Kennedy was assassinated, starting at the beginning for the uninitiated reader; then providing the complete story up to the present.
- Newly released documents are presented which show that the plot involved a deceptive plan to precipitate an invasion of Cuba by U.S. forces; and explains why this plan was discarded shortly after the assassination.
- A new discovery by Twyman is presented, proving with easily understood analysis that the Zapruder film was altered to conceal what really happened at the time of the fatal shot. Quality color photos of 26 critical frames from the film are included with permission from the attorney for the Zapruder family estate. This, along with evidence of alteration of x-rays and documents, links the cover-up of the assassination to the highest levels of the executive branch of the U.S. government.
- Newly released tapes and documents show that Lyndon Johnson used nuclear war scare tactics to intimidate key people in Dallas and Washington, D.C. to cover up the crime and that he, J. Edgar Hoover, and the CIA knew at the time these scare tactics were false.
- Twyman provides an updated analysis of the horrifying events before and during the autopsy, based on consultation with medical scientists and

*It will surely be written about the*

documents from the National Archives corroborate author David Lifton's discovery that Kennedy's body was literally stolen from *Air Force One* and modified to conceal evidence before the body was delivered to the autopsy room at Bethesda Naval Hospital.

**BLOODY TREASON** contains new evidence direct from Cuban intelligence. And dramatic revelations are presented from CIA operatives who were involved in the periphery of the assassination plot. This evidence reveals that right-wing extremists in Dallas and New Orleans met with CIA operatives in 1962 and 1963 and that at these meetings the assassination of John F. Kennedy was discussed and contract offers made. It also reveals that documents and information about Oswald in Mexico City were fabrications.

Twyman takes us deep into the labyrinth of the JFK assassination plot and reveals the shocking tradecraft of covert political assassinations practiced by the U.S. government during the 1960s. He explains how these programs tragically backfired, resulting in the assassination of President Kennedy. The evidence of the master conspiracy is developed step-by-step until the identities of the powerful people behind the plot are revealed.

**BLOODY TREASON** advances the understanding of the JFK assassination to an entirely new level. The shocking revelation of corruption and betrayal in high places is without precedent in U.S. history.

#### ABOUT THE AUTHOR

Noel Twyman, after a career in which he founded two successful companies, retired, and for the past five years has completed the investigative work and writing of **Bloody Treason**. He has an Engineering Degree from Stevens Institute of Technology and a Masters Degree in Business Administration from Pepperdine University. He is a Registered Professional Engineer (Inactive) in the State of California and holds several patents in industrial processes. He lives in Rancho Santa Fe, California with his wife, Darleen.
