Dear Worry Warts,

The bald eagle has landed back in the U.S!  
Much to my surprise the American Super Power  
is in fear of fighting Saddam. Little Israel  
is just waiting for the right time to settle their  
problem with Iraq. Not that Israel is relishing a  
fight with Iraq but they know that sooner or  
later Saddam must be eliminated. The sooner the  
better. They will not appease him as Europe appears  
1.

Birmingham charges-FBI distrust~~staff~~ of Memphis USA-could not control him

This serial provides a beginning point for a relatively short search through 44-38861 and the companion Memphis file to locate and copy those serials relating to this that as I recall are a discussion of and communications with Birmingham in which FBIHQ did not trust it even to prepare the press release. (To self- compare with p.2, graf 2 on Complaint becoming public knowledge. As all do as soon as filed.)

I am also interested in the FBI's fear it could not control the Memphis USA. There is one record on this in 3-drawer cabinet, I think under USA, Memphis. There may also be a Birmingham, charges file. If so do not <sup>u</sup> copy what is in it. It may provide a lead for shortening the time required for the search. So also may the Memphis USA record.

If I do not have a Birmingham, charges file, or one meaning this, please start one.

In reviewing the appropriate sections remember that filing is not chronological and that it may be necessary to skim toward the front of the sections. There is a greater likelihood that field office files are closer to chronological in order.
