

9/8/67

Dear Hal,

Your call was a pleasant surprize. I've packaged the picture for mailing by air. It will go with this, that is, in the same mail.

Well, your reference to the Leavelle exhibit solves onemystery for me: I've been trying like hell to find that in the radio logs, firm in the belief it is there that I first noted it. In looking up the reference when you gave it, I find I had marked it back in 1964 and forgotten the source. I've been saying that it was in the radio logs, too.

I'm glad you are going to mention Sprague and his work. I hope you will indicate that, from what I have read from him, I have a very high regard for it and great expectations. It has actually be a feeling of relief to know that one thing I could not follow down another could. And to have him do so well! That is a fine feeling. I do wish xhe would write his work up but he indicates he won't.

ing
Save for the enclosed, there has been no interest~~at~~ development in the correspondence.

I presume - and hope - you understand my sometimes strong personal feelings about some of what we talked about are not mere vanity. They are part of a very real problem we have to live with. Should anything happen to me, they will be part of making the problems I would leave my wife more serious. They immediately make problems and have certain costs to me. It is not generally the man who complains when a woman in raped.

If you can pick it up, please hold a copy of the NYReview-Popkin for me. Avon and Jones had separately told me it was coming. Not on sale here. Haven't been in Washington for several weeks. I suppose someone there will have it for me, tho.

I doubt very much if the NO book is being printed at this moment, as I understood you to indicate J had told you. I think the last part of JG's foreword didn't reach Parallax until day before yesterday. I'm curious to know how who got a copy. I haven't been able to look at galleys, which my wife carded for indexing when pages are cast off. Might save some time. May have another printing an use index!

Regards, Hal.
