

Didn't recognize voice on Owen Spang, but thanks to whoever it was. If the Suby-cab story made the papers, I'd appreciate a clipping. Spent 2 1/2 hours on a night talk show in Washington last night (longest they ever did). Not a single adverse question or comment! 1/2/88

Dear Hal,

For whatever purpose, whether or not consciously, I am now satisfied that Lifton is working for Liebelar. The concept and use (or misuse) of his memo on the speed of the Zapruder camera and the deliberate lies, distortions and misrepresentation to which he from there goes, leave me no other choice.

First he started this with Maggie. Then he has a campaign against Steve Burton and tries to intimidate him into not using Liebelar's 5/2/67 confessions, and now he turns to me.

I've told him that when he feels like writing or phoning me again to cut out a few more papier-mache trees for Dealey Plaza, as you can see.

So far as his warning on the Liebelar tape, I've used it again, last night, in a 2 1/2 hour talk show in Washington. For the first time that I can recall, not a single adverse comment or question in more than an hour of calls and in Washington. In it I also accused the CIA of leaking the alleged Garrison medical records, tracing it to Devel's lawyer Jerry Weiner the day before the ChiTrib story. I said the Department of Dirty tricks is interested in only its own well-being, not LW's, and that somebody had better take the job of thinking this stuff back from them-that every one of the upcoming similar dirty tricks makes some people wonder whether Johnson is involved.

I understand Loran Hall and wife were interviewed on WHER (and perhaps elsewhere also). It is possible to get their (these) tapes, I'd very much like it (them) as fast as possible. We could not pick them up there until Saturday. Whether he did after the story broke, I do not know. But it was not too late if he did.

Have a good year.

Also, if there is a Colon-Bobby tape, I'd like that, too. Understand he opened his TV show with that. Best to you all,
