

4/5/68

Dear Hal,

Several Canadians are working with me. I think you know of Murr, who has taken over on Sibilis. Another, who you do now know, has located a film in Western Canada that may be of interest.

This reminds me of Boyle-Wilson. I've heard nothing more from you. Did you ever get the film? What is the status?

If you do not have it, and if this second guy will make his available, perhaps I should try and make arrangements to go out and get or try and get both. The longer such a thing is delayed, if it seems necessary, the more hazardous it becomes.

I spent yesterday evening with Dr. John Nichols, with whom Paul has been in touch. He has done interesting and important work. I told him some of my unpublished work, showed him some that you haven't seen, and he is really excited. I'll be hearing more from him.

He is not only an expert on pathology but he is a rifle buff, having been on his college rifle team. He has done very interesting ballistics work.

I go to N.O. early a.m. 4/9, return 4/15, leaving there early a.m., stopping in Washington to do 7 p.m. TV show. I'll be home about midnight that night. I tell you this in case you have to get in touch with me. I'll be available through Jim. I have asked the other fellow to try and let me know about that film. Please you do the same in case I have to take it up with him.

Hurriedly,
